Shaping your potential

# Defence Capability Statement

Baso Group is an industrial system  
supplier to the Defence industry

# FULL-SCOPE SOLUTIONS

Baso Group is the complete partner for industrial system deliveries – from concept and design to finished product, assembly, repair and maintenance for safety- and mission-critical, authority-regulated applications with requirements for traceability, configuration management, change control and verified documentation throughout the entire lifecycle.

We deliver documented precision solutions within laser cutting, robotic welding, CNC machining, assembly and hydraulic systems – developed for environments with zero tolerance for deviation.

Within Baso Group, requirements, quality, environment and safety are governing principles and are ensured through auditable, controlled and validated processes.

## Certifications and standards

- ISO 9001
- ISO 14001
- ISO 45001
- AS 9100
- ISO 3834-2
- DIN 2303
- DS/EN ISO 15614
- NORSOK M-601
- NORSOK M-501
- EN 1090

DIN 2303 defines quality requirements for welded components for defence and security-related applications, including requirements for process control, traceability, documentation, organisation and competencies.

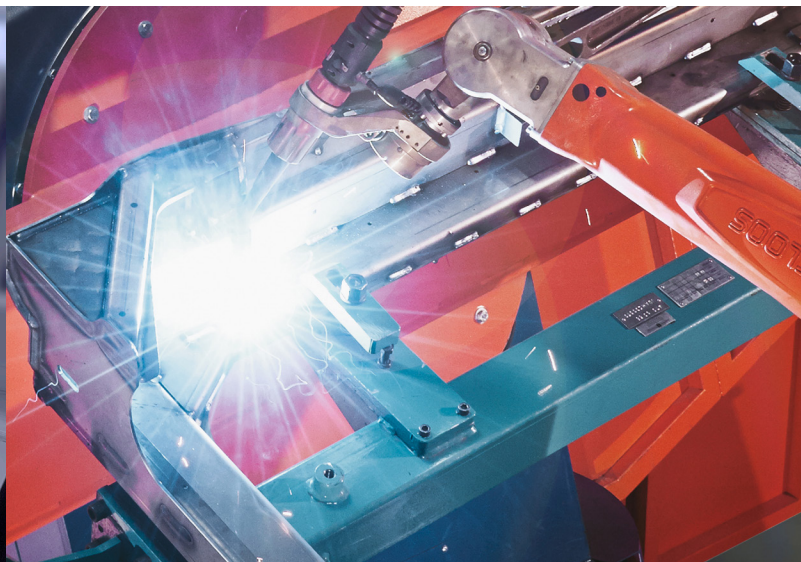

# One-stop system deliveries for industrial and safety-critical applications

Baso Group combines competencies from several highly specialised companies within advanced industrial processes and development of technical components and systems. This ensures a coherent value chain with solutions based on documented process control, verified quality and high delivery reliability.

Baso Group supports Defence programmes with engineering and development capabilities, prototype and serial production of both components and complete structures including assembly, scalable capacity across companies, requirement-driven documentation and technical collaboration from quotation to delivery.

# Solid foundation – trusted partner.

Baso Group is a company under the Bagger-Sørensen family and BSE. The Bagger-Sørensen family is a Danish industrial family focused on long-term ownership, technological understanding and active engagement in industrial companies, with a clear ambition to strengthen Danish-based production. Investments are managed through Bagger-Sørensen Equity (BSE), the family's investment and ownership platform.

BSE primarily invests in Danish industrial and technology-based companies with potential for long-term value creation through industrial development and professionalisation.

BSE operates with active ownership and patient capital, focusing on strengthening core competencies and establishing robust, competitive structures with high operational reliability and responsible anchoring.

Baso Group originates from this approach and is established to consolidate strong industrial competencies within metal processing, precision engineering and system deliveries into one unified structure, focused on long-term industrial development within Danish frameworks for quality and security.
